Republic Polytechnic   **April 2022 - Current**

Anticipated completion date: Feb 2025

Diploma in Digital Design & Development

Geylang Methodist School (Secondary)   **January 2018 – December 2021**

GCE O Level

Kheng Cheng School   **January 2012 – December 2017**

PSLE

Notable Learning Experience/Projects

PolyFintech100 API Hackathon 2023

For this hackathon, my team and I chose the area of decentralised finance, and we came up with the idea of creating a lending platform for the unbanked in Vietnam, which was targeted mainly at the youth. I was in charge of creating the prototype and coming up with the competitor analysis and the user journey map. Previously, I did not have any experience in using Figma but I learnt it along the way while doing this hackathon with the help of my teammates. Although my team did not make it pass the semi-final selection, it was a good learning experience. I got to learn a little more about Financial Technology (FinTech).

School of Infocomm Student Overseas Trip to China, ShenZhen (24 – 29 September 2023)

From 24-29 September, I had the opportunity to participate in the school's overseas trip to China, ShenZhen, where we got to learn a lot about the different companies and various IT industries there.

Throughout the 6 days, I got to visit various companies and institutions such as DJI, BYD, ShenZhen MSU-BIT University and ShenZhen Institute of Advanced Technology,Chinese Academy of Sciences, where I had the chance to learn about the different technologies used in the products and interact with the students from the University. These 6 days were enriching, and I learned much more about the IT sector outside of what I am learning in class.

Volunteer and Leadership Experience

Digital for Life (DfL) Student Ambassador with CSA, IMDA

27 – 28 October 2023, 4-5 November 2023

Student Ambassador

- Taught seniors how to download Scamshield, Anti-Virus software on their phone
